## Description:

Our mini project is based on the theme of making a user-friendly online shopping website which helps user to create their account and maintain their data, orders, favorites which helps them to access the items they like more easily.

## Process Stages:

This project is made using HTML, CSS, JS. Thus we divided this into stages for making, styling, linking.

- Pages Creating.
- Styling.
- Linking and Connections.

## CSS....

**Pages Creation:** Our website contains 16 main pages upon their specific processing stages.

- registration page.
- login page.
- home page.
- cart page.
- men page.
- women page.
- shirts page.
- jeans page.
- trackpants page.
- tshirts page.
- kurtas page.

- palazzos page.
- sarees page.
- s\_g page.
- am page.
- aw page.

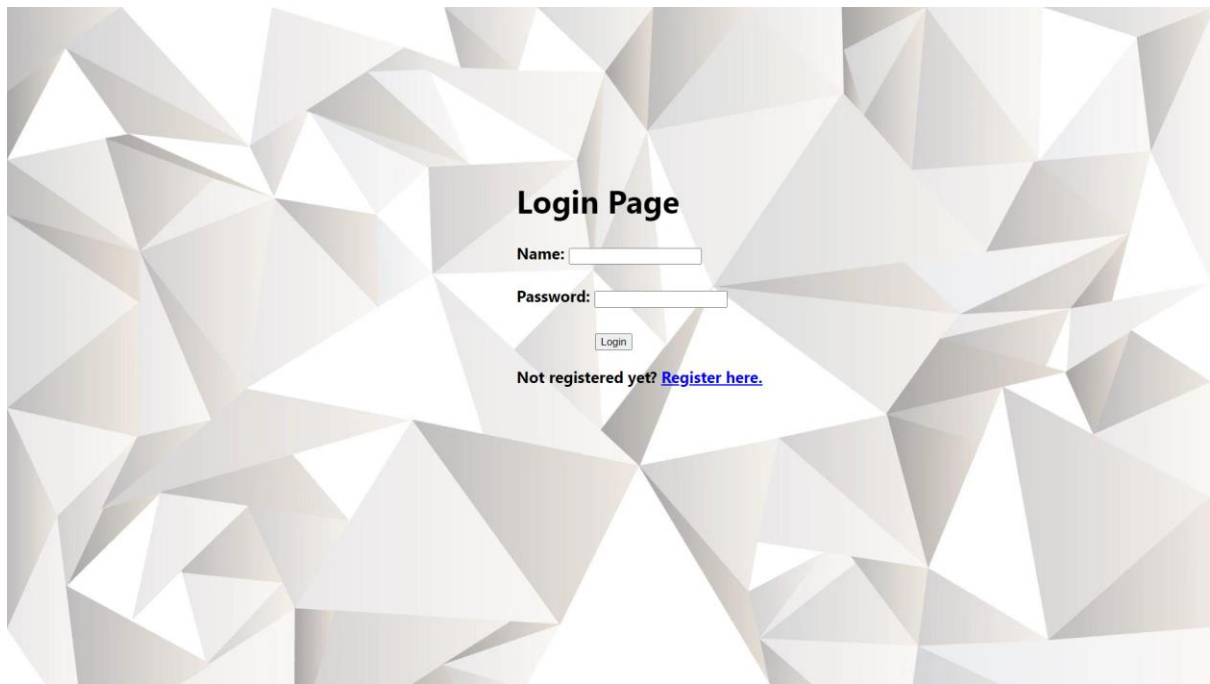

## Registration page:

Registration page helps user to get registered in our website, if there's any existing account on that credentials then we navigate them to login page.

The image shows a registration form on a webpage. The form is located on the left side of the page. It has a light gray background. The form fields are: Name: [text input], Mobile Number: [text input], Residence: [text input], Pincode: [text input]. Below these fields is a 'Register' button. Below the button is a link: 'Already registered? [Login here.](#)'. To the right of the form, the text 'Registration Page' is displayed in a large, bold, red font. The background of the page features a stylized graphic of a red and black striped path leading towards the right.

## Login page:

Login page makes the user to login into their account and thus we navigate them to our main page, if the entered credentials are incorrect an alert is displayed to the user to make them check the entries.

## Home page:

Home page contains elements like logo of the website which brings the user to home page when they click ok. cart and gender specification buttons for user to search upon their filters.

## Cart page:

As cart page contains once cart elements, by default it shows “No items in cart” if there’re no items added in cart. Cart will be visible on every page even if the user can go to cart after checking to many items.
