MINI PROJECT

PROBLEM STATEMENT:

Create an online shopping website/page for clothes and jewelry with a home page that has links to all types of items sold on website.

Description:

Our mini project is based on the theme of making a user-friendly online shopping website which helps user to create their account and maintain their data, orders, favorites which helps them to access the items they like more easily.

Process Stages:

This project is made using HTML, CSS, JS. Thus we divided this into stages for making, styling, linking.

- Pages Creating.
- Styling.
- Linking and Connections.

CSS….
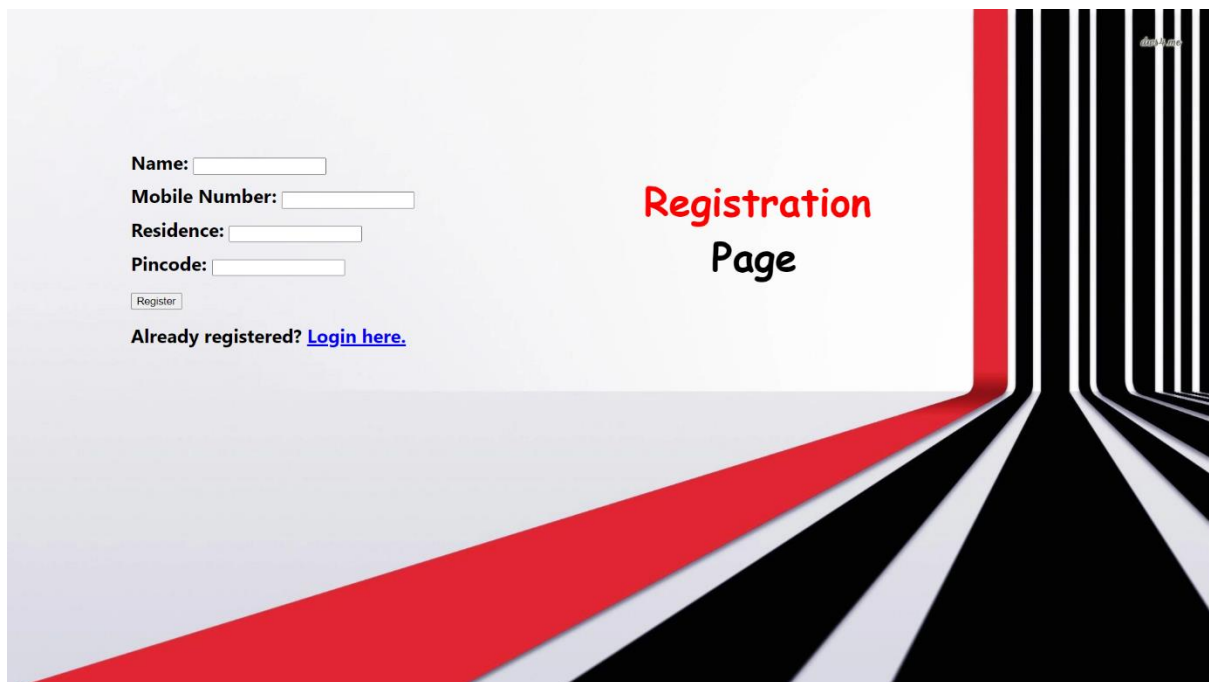

Pages Creation: Our website contains 16 main pages upon their specific processing stages.

- registration page.
- login page.
- home page.
- cart page.
- men page.
- women page.
- shirts page.
- jeans page.
- trackpants page.
- tshirts page.
- kurtas page.

- palazzos page.
- sarees page.
- s_g page.
- am page.
- aw page.

Registration page:

Registration page helps user to get registered in our website, if there's any existing account on that credentials then we navigate them to login page.

Login page:

Login page makes the user to login into their account and thus we navigate them to our main page, if the entered credentials are incorrect an alert is displayed to the user to make them check the entries.
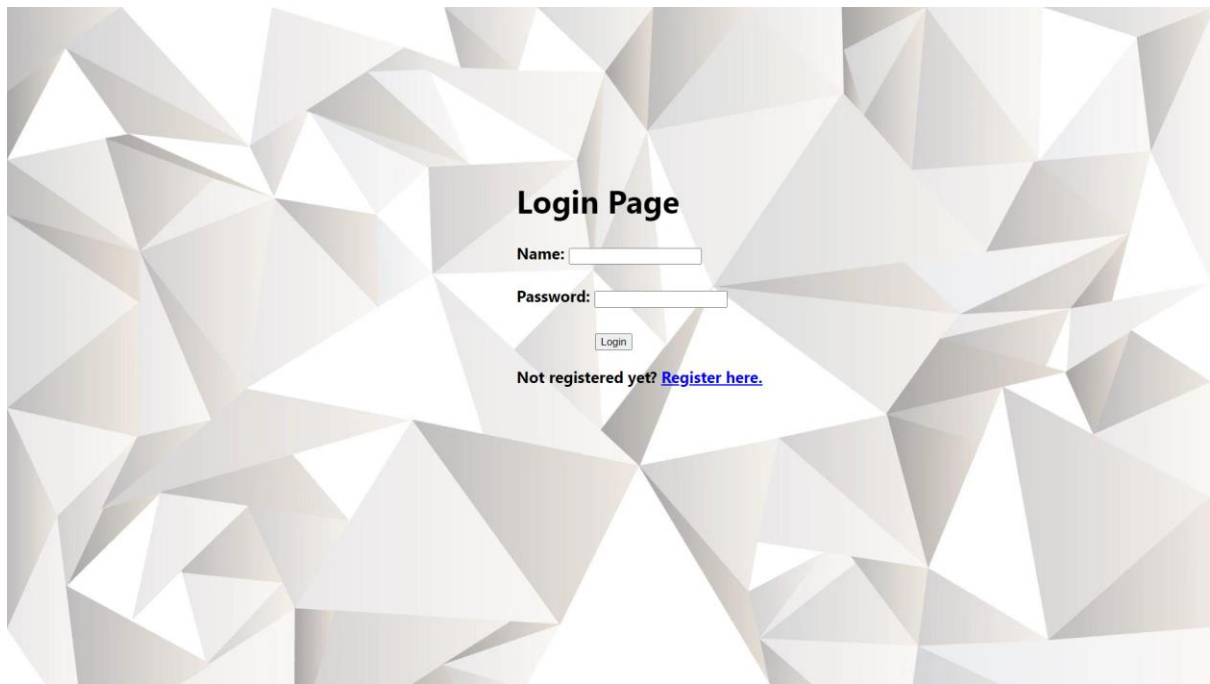

Home page:

Home page contains elements like logo of the website which brings the user to home page when they click ok. cart and gender specification buttons for user to search upon their filters.

Cart page:

As cart page contains once cart elements, by default it shows "No items in cart" if ther're no items added in cart. Cart will be visible on every page even if the user can go to cart after checking to many items.
